

## **Artificial Intelligence verses Spiritual awareness**

Since all forms of AI (artificial intelligence) are the result of our conscious perspective, it is impossible for AI to function on a spiritual level. It's a man-made machine. Only our connection to the Holy Spirit through faith can elevate our spiritual understanding and take us beyond our consciousness. When our conscious awareness dies with our body, for us, AI no longer exists. AI can never be an artificial God. AI is finite, it can never experience true human heartfelt feelings of unity, love, compassion, and empathy, also, consider our need for human touch, both mental and physical. The energy from eternity that gives rise to creation. (the conscious dimension) is responsive to our human consciousness, not to AI. If we allow AI to handicap our ability to function as a natural lifeform, we have only ourselves to blame. AI cannot be held responsible for our lack of insight and bad choices. Like Tom Hanks said in the movie Forest Gump, stupid is as stupid does. Behavior always reveals the truth. We must put maximum effort into regulating the outcome of AI. AI can't hurt us, but we can.
