

Gods Unconditional Love

Gods unconditional love is pure truth, Gods love envelopes all of creation. It is before and after all of creation. God's love is eternal. It is a force that can be realized but never defined, it is the mover. It only creates productive, positive results, all negative results come from our conscious perspective, this is difficult for us to realize because our ego (self) puts conditions on how we think things are or should be. Evil only exists in the absence of love; darkness only exists in the absence of light. God is light, God is love. Unconditional love is not something we choose, it is rather something that we become when we immerse ourselves in what Jesus Christ taught us about love, Jesus is God incarnate, God is love. Love is the feeling that originates from our soul through our heart, not a conscious decision that originated in our brain. Our brain can determine the value of unconditional love but not the inherent understanding that it places in our soul. Gods unconditional love can only be realized through faith. Once we realize Gods love it can never be changed. Unconditional love is the eternal constant that gives rise to all of creation. When we experience a heartfelt instinct that triggers a compassionate response directing our behavior with unconditional love, miracles do happen. While in this state of mind and spirit you can deny self and become one with the Holy Spirit. To deny our conscious self we must seek within and let go of our conscious awareness. This is where we pray and God listens, if we don't seek within, then we live without. With God all things are possible. Amen
